Abstract

Medical astrology (traditionally acknowledged as iatromathematics) is an original medical system that connects with different parts of the body, illnesses, and medicines as under the effect of the stars (Nakshetra) and planets that may give the results according to his Karma (work) already done in the pre- birth and the present movement. Each of the astrological results influenced by the location of the stars and planets is linked with illnesses including malignancy of divergent parts of the human body. This study has tried to show the liaison of medical and astrological science to justify how the planets are responsible cause for the head & neck cancer in human being. It has also displayed the correlation between the medical astrology with head & neck cancer disease. The random sampling of the cancer individuals diagnosed histopathologically was selected for the study purpose. By taking informed consent, total twenty head & neck cancer individuals were chosen for the Kundali (birth chart). The Kundali was prepared on the date and the time of birth of the cancer patients recorded by themselves and their relatives or other responsible member. The Kundali, was prepared based on the calendar issued by the Nepal Panchanga Nirnayak Committee (NPNC). The result showed the possibility of pre- diagnosis of the head & neck cancer disease from the astrological point of view. So, it seems to be superior when mixed up medical astrology in modern healthcare system to prevent and control the cancer diseases.

INTRODUCTION

Head and neck cancer is a group of cancers that starts in the mouth, nose, throat, larynx, sinuses, or salivary glands etc. The annual incidence of head and neck cancers worldwide is more than 650,000 cases with around 330,000 deaths each year. Male to female ratio ranges from 2:1 to 4:1. About 90% of all head and neck cancers are squamous cell carcinomas (HNSCC). HNSCC is the sixth leading cancer by incidence worldwide. Similarly, 57.5% in Asia and largely in India (20 per 100000 population). In Nepal 2015, total 9718 new cancer cases were reported by hospital based national cancer registration programme. Whereas, 1882 (19.3%) were head & neck cancer. There were only 1363 (19.2%) out of 8729 cases in 2011 and 1401 (19.4%) in 2012. Similarly, 1741 (19.9%) and 1868 (20.3%) cases of head & neck cancer were diagnosed for 2013 and 2014. Now days, head & neck cancer disease is increasing per day. The main factors of cancer increase are considered to be the use of tobacco, poor –hygiene, alcohol, betel, HPV-infection. The research done in the past shows the cancer causal-factors that one of the planets. This study have done regarding epidemiological concern, tries to display astrological risk factors and the connection of head & neck cancer and the astrological views. Astrology is a kind of science. It is considered as the light of knowledge. As light shows the objects lying in the darkness so does astrology predicts the person's future activities. And it offers guidelines as for possible. Astrology can introduce the mystery of pre-life of the persons impact on the birth position of the person, horoscope and Lagna Kundali show as to what happened, is happening and will happen can be guessed only by the astrology. It is taken as to be the true instrument (Laghujatakam, Kamala Kanta Pandey, Chaukhamba Surbharati

Prakashan, Baranasi, India, 2016:2). In the context of the random sampling of twenty patients among them some have taken treatment and some have other curative, palliative and supportive management. Different horoscopes and Lagna Kundali were analyzed and the difference has been studied for the head & neck cancer problem on the basis of astrological influence has been analyzed. The research of the disease and the astrological thought, the relation can be between the disease and astrology. As is seen as to what the person is influenced to the disease, it can attack it, which is the saying of the astrology. The astrological horoscopes can assume the reason of the disease. To show the inter connection between the medical science and astrology is the study which can be called medical astrology.

MATERIALS AND METHODS

The random sampling of the individuals visited hospital for head & neck cancer disease treatment has been selected for the study. By taking informed consent, total twenty cancer disease treating individuals were selected for the Kundali. The Kundali was prepared on the date and the time of birth of the cancer patients recorded by themselves and their relatives. The preparation of Kundali, was based on the calendar issued by the Nepal Panchanga Nirnayak Committee.

Limitation of the study

The horoscopes made on the basis of Siddhanta Jyotish and predictions have been done on the basis of the Falit Jyotish.

RESULTS

This study explains the twenty cases based on the Lagna Kundali through the interaction made on the head and neck

DISCUSSION

In recent days, the observation of the data of the head & neck cancer shows its increasing condition. Even in Nepal, the head & neck cancer is giving to increasing rapidly. According to the medical science, the poor hygiene, alcohol, tobacco use, HPV infection are its major factors. In this regard, the celestial planets are thought to influences the human body. Some research, too, shows the planets responsible to grow the cancer in the human body. Therefore, this study exhibits the relation for head & neck cancer incidence. Every human bodily organ has their own causal-planet system. According to the nature of that planet, the disease, too, comes to occur when the native is susceptible to any kind of the disease. If any is susceptible to the cancer and is exposed to any other cancer-risk-factor, then possibility of the cancer seems to be there. Head & neck cancer incidence doesn't mean that only one bodily cancer but it covers the lip, mouth, palate, gum, larynx, throat etc. and above all the cavity along with the other and unspecified sides of head & neck site. According to the Vedic astrology, the cause of oral cavity to be is the Taurus zodiac. The throat it has the Gemini zodiac sign as the main factor. Oral cavity comes under the head & neck cancer, of which the Venus is said to cover this area. The main causal-factor of throat is the Gemini zodiac which is related with the Venus. The head & neck cancer is likely to take place on the suffering of the Venus and Gemini zodiac or the Lord of Gemini.

CONCLUSION

Every human bodily organ has their own causal-planet system. According to the nature of that planet, the disease, too, comes to occur when the native is susceptible to any kind of the disease i.e. head & neck cancer.
